

Eye on Success at Bridgeport Elementary Schools September 2015

Attention Bridgeport parents! Your child needs many things to succeed in school and good vision is one of them. Your child may not tell you that he or she has a vision problem because they may think the way they see is the way everyone sees.

Does your child:

- Rub his or her eyes and blink a lot?
- Have a short attention span?
- Not like to read?
- Have a lot of headaches?
- Cover one eye?
- Tilt the head to one side?
- Hold books close to the face?
- See double?
- Lose his or her place when reading?

If you answered “yes” to one or more of these warning signs, please call your local optometrist office and schedule an eye exam for your child today. Vision changes can happen without you or your elementary student noticing them, so it is a good idea to schedule an eye exam for your child once a year.
